

AVNISH

SOFTWARE ENGINEER | FULL-STACK DEVELOPMENT & AI APPLICATIONS

Bokaro, Jharkhand, India | +91 7782816343 | avnish1234pandey@gmail.com

LinkedIn | GitHub | Portfolio

SUMMARY

Software Engineer building full-stack applications, REST APIs, and AI-assisted workflows. Co-developing a test generation framework at Infosys, with project experience in LLM integration, data processing, and machine learning. Combines application development with automated testing and data validation.

TECHNICAL SKILLS

Languages: Java, Python, SQL

Development & Data: React, React Native, FastAPI, REST APIs, MongoDB, MySQL

AI & Machine Learning: Groq API, LLM Integration, GitHub Copilot CLI, scikit-learn, OpenCV

Testing: pytest, Selenium, Playwright, Cucumber, REST Assured, Postman

Tools & Practices: Git, GitHub, Jira API Integration, Agile/Scrum, Data Validation

EXPERIENCE

Infosys Limited | System Engineer

Bengaluru, India | Oct 2025 – Present

- Co-developing an early-stage AI-assisted framework with a senior engineer using GitHub Copilot CLI to turn project requirements into test cases and reports.
- Integrated Jira REST APIs to fetch tickets, user stories, and existing test cases; transformed relevant data and business rules into inputs for an agent-based workflow.
- Connected workflow components to generate test scenarios, code-formatted outputs, and report summaries, including boundary-value and edge-case scenarios.
- Built reusable Selenium and Playwright tests with POM and Cucumber; validated API behavior and backend data using REST Assured, Postman, and SQL.

NextTechFusionGadgets Pvt. Ltd. | Application Developer Intern

Remote, India | Aug 2025 – Sep 2025

- Resolved 10+ React Native build issues and integrated screens with REST APIs; debugged application flows and validated API responses.

Plypicker Pvt. Ltd. | Software Engineer Intern

Pune, India | Jan 2025 – Jun 2025

- Validated 1,000+ product records for backend ingestion and reduced processing time by 20% through data validation and workflow improvements.

PROJECTS

Loan Data Verification Copilot | Hackathon Project

Live Demo | GitHub | Setup & walkthrough: README

- Developed a full-stack application with React, FastAPI, and MongoDB to ingest, normalize, and reconcile loan data across three source types.
- Integrated Groq LLM recommendations into exception review, with human approval, role-based access, REST APIs, and traceable audit logs.
- Implemented SHA-256 hashes for verified records and pytest tests covering validation rules, data normalization, and AI review controls.

Hand Gesture Recognition System | Oct 2025

- Built a Random Forest gesture classifier using Python, OpenCV, MediaPipe, and scikit-learn for A-Z and 0-9 recognition, with real-time webcam predictions at 15-20 FPS.

EDUCATION

Vellore Institute of Technology, Bhopal | 2021 – 2025

B.Tech in Computer Science and Engineering | CGPA: 8.56/10

CERTIFICATIONS

Claude Certified Architect - Professional | Anthropic | 2026

Claude Certified Developer - Foundations | Anthropic | 2026

Coding: Solved 200+ problems on LeetCode and GeeksforGeeks.
